WORK EXPERIENCE

Technical Mentor

Codex Institution

October 2021 – present

- I assist students at the University of Johannesburg with Front End development skills.
- I assist the student with back-end development skills.
- I provide technical assistance with any coding challenges.
- I assist students with the development of their capstone projects.

Full stack developer

Esmart, Remotely

Nov 2020 – Jan 2022 (1 year, 2 months)

- I Built, maintained, and deployed web applications and added new features to the eSmart app.
- Built eSmart, an e-waste management web application that helps users manage their waste

EDUCATION HISTORY

Project codeX, Western Cape, Cape Town – Java Application Development.

March 2020 – February 2021

Project codeX, Western Cape, Cape Town – Agile Developer Training program.

Full-stack Web Developer.

April 2019 – December 2019

Osizweni High school, KwaZulu-Natal, Newcastle – High school.

January 2014 – December 2017

SUMMARY

I am a full-stack web developer currently working for codex as a Technical Mentor. I have been assigned to mentor students in a program at the University of Johannesburg in collaboration with Accenture. The program is meant to prepare students for the work environment by equipping them with skills in full stack development, 4ir technologies.

RELEVANT SKILLS

- React Native
- NodeJs
- ExpressJs
- JavaScript
- PostgreSQL
- Heroku, Digital Ocean
- Firebase
- Git
- SQL
- Python Language
- Git Hub
- HTML, CSS
- DOM
- Lanux/Ubuntu
- React.js
- Angular js
- VUE js
- TypeScript
- Java

COMPLETED PROJECTS

2022 - jukebox player - URL (jukebox-player.com)

GitHub Repository: [jukebox player](https://github.com/jukebox-player)

This project is for learning purposes; in this project, I am learning to react hooks and refining my react knowledge with how to write only functional components instead of the old class component style.

2021 - rea order app

GitHub Repository: [rea order](https://github.com/rea-order)

A food ordering system - Users place orders for their favorite meal, and the admin site manages received orders. I'm using this to learn React JS and React Native.

2021 - eSmart app

GitHub Repository: [e-Smart](https://github.com/e-smart)

eSmart is an innovative Integrated waste management system for municipalities, cities, and private-owned properties. Our mission is to deliver a resourceful, greener, and environmentally sustainable waste management system that empowers citizens to help protect tomorrow.
